

Bringing Coffee to You Wherever You Are

Nothing beats a great cup of coffee and the demand for fantastic flavour in remote or changing locations is continuing to rise.

One client who has started to convert delivery vans to mobile barista stations is Café 2 U. Working with leading vehicle converters, Automotive Electrical in Mirfield, West Yorkshire the company have installed environmentally friendly power systems that allow all the onboard equipment to be run without a generator. The vans simply plug in to a mains connection overnight to recharge the battery ready for another day delivering caffeine delights.
